

CENTRAL COUNTY ACS

ISSUE: 08/20/2008

Emergency Communications Net Script.

Good Evening, This is (Name), (Call Sign). I will be Net Control tonight for the Central County ACS group.

This Net meets every Monday evening at about 1910hrs. Or right after the County Net on 145.350Mhz. With a PL of 88.5.

This is a directed Net.

All stations should direct their traffic through the Net Control Station.

If at any time there is an "EMERGENCY" during the Net, indicate so with the words, "EMERGENCY" on your first "key-up."

The purpose of this Net is to share information with the Central County ACS group and to practice the skills of traffic handling and standard Net Control operations.

"Should the repeater be down or go down during our Net, OR during an active Emergency - Please tune your radio to the output of the 145.350 Repeater. (Be sure you set it to 145.350 "Simplex." That is NO PL and NO NEG. OFF SET.) Then continue to follow net control procedures."

Are there any announcements for this Net? (Pause for a short time)

At this time I will take "Check-In's."

Shortly, I will take guest check-in's, but first are there any late "Check-In's"?

Now are there any guest "Check-In's"?

Before we close this Net, Who would like to be Net Control next week for the Central County Net?

This is (Name) (Call Sign) closing the Central County Net. Good Night.
